

Which refrigerator is right for you? From our luxury GE Monogram line, to the stylish GE Profile series, to our timeless GE brand – we have the appliance to fit your home and lifestyle. And 2009 is the perfect time to explore GE's refrigerators and freezers. Discover the latest leaps in innovation!

# GE Refrigeration. As cool as it gets.

## GE Appliances

One of the largest manufacturers of major appliances in the world, GE has been introducing advanced appliances to improve people's lives since 1907. We're continuing that legacy today with energy-conscious innovations that deliver optimal performance. All of our appliances are designed to make every home more functional and more beautiful. GE innovation truly makes life easier ... and better.

## 100 years

At GE, we ask: "Why predict the future when you can create it?" From our earliest days, our company has used the tools of research, combined with inspiration, to create the world of tomorrow. People have come to rely on the GE brand – and we're excited about what our future holds. 100 years of innovation, style, performance and quality ... and we're just getting started.

## GE Refrigeration

GE Refrigeration embraces three brands: GE, GE Profile and GE Monogram. And with a major breakthrough in cooling technology in addition to continually refreshing designs. There's never been a more exciting time for our flagship refrigerators.

A+ ENERGY

Introducing 5 new models of GE side-by-side refrigerator-freezers with A+ class energy – stylish, versatile and energy-efficient. Combine cutting-edge technology and advanced options for preserving foods with savings on your energy bill.

The broad range of GE side-by-sides demonstrates GE's leadership in refrigeration technology. The stylish exterior, featuring an elegant smooth surface, makes a dramatic statement. Available in high-gloss white or black, CleanSteel version, or with trim kit option for a fully 'hidden' integrated solution with your kitchen cabinets. The 607 mm case depth has been designed for perfect harmony with European kitchen cabinet standards.

Open the doors and see how the multi-level interior makes optimal use of storage space. The 648 litre (21 cu. ft.) capacity is divided into 400 litres in the fresh food section and 248 litres in the freezer section. In addition, both refrigerator and freezer compartments offer a range of cooling capabilities for the ultimate in flexibility and performance.

Through precise digital controls, electronic sensors and a multi-flow air tower, the ClimateKeeper System manages temperatures, with higher humidity in the fresh food compartment. Combined with GE's FrostGuard technology, which defrosts the freezer only when necessary, the risk of freezer burn is greatly reduced.

The five new GE side-by-side refrigerator models are all rated A+ class energy, with only 467 kWh per year usage. An external control panel allows you to manage all the functions of the refrigerator, including the temperatures settings, without opening the doors – saving energy, as well. The overall energy consumption is reduced by approximately 15% over comparable GE branded A class models (\*).

(\* Based off of comparing GCE21XGY (476kWh/year) vs. GCE21LGV (550kWh/year).

## Feature Gallery

**GE Water filtration**  
Removes impurities, providing your family with fresh-tasting, filtered water all day long.

**Slide-out, spillproof glass shelves**  
These adjustable shelves make clean-up easier by containing spills within the shelf surface.

**FrostGuard Technology**  
Monitors door openings to calculate when it's necessary to defrost. Also activates a pre-chill function to lower the freezer temperature prior to the defrost cycle.

**Integrated Ice system**  
Designed to supply you with plenty of ice, while giving you more room to store your favourite fresh foods.

**CleanSteel feature**  
Thanks to the magical innovation of the CleanSteel feature, it doesn't fingerprint and is very easy to keep clean.

**'A+' Energy**  
You can have cutting-edge technology and advanced options for preserving foods, while saving on your energy bill.

**LightTouch! Tall dispenser**  
Accommodates tall glassware and dispenses water and ice at the touch of a fingertip.

**Adjustable ClearLook door bins**  
Transparent fronts make finding your favourite door items quick and easy.

**External electronic control**  
You can control all the functions of the refrigerator - including the temperature settings - without opening the doors. Saves energy and is so easy to use!

**Humidity-controlled vegetable / fruits compartments and sealed snack pans**  
Help to preserve the freshness of foods, keeping their flavour longer and preserving vitamins, minerals and other nutrients.

**ClimateKeeper System**  
Through precise digital controls, electronic sensors and a multi-flow air tower, the ClimateKeeper System manages temperatures, with higher humidity in the fresh food compartment, to keep foods garden fresh longer.

\* Note that not all features are available on all models. Please see the product specifications for details.
