New GE Microwave Oven Combi Combines Convection, Grill and Microwave Cooking in One Oven

Complete Line up of GE Microwave Ovens are Indispensable Kitchen Tools

Brussels, Belgium – For the consumer who has ever wished for a second oven but does not have the space for one, GE delivers the **GE Microwave Oven Combi (model GMOH30)**. This 30 liter capacity countertop microwave oven combines convection, microwave and grill cooking in one oven.

Convection oven cooking combined with microwave power produces beautifully baked and roasted foods fast. The convection fan is surrounded by 2050 watt heating element so the oven can cook food faster. Foods cooked at this setting are typically done quicker than it would take in a regular oven. Plus, you retain full browning and crisping capability -- something you simply cannot get from a basic microwave oven.

It is easy to enjoy the fine flavors of cookout season year-round – rain or shine – since GE has combined 1250 watts of grilling power with an advanced microwave oven. This Combi oven simply sizzles in any kitchen, bringing out the best flavors of food with a variety of grilling options: chose from preprogrammed settings for moist chicken breasts crunchy pizza and more. Or use the manual option that gives the chef control over the settings to achieve perfection, according to his or her personal taste. Savory results are so simple, no matter what the weather.

A wide selection of convenient settings simplifies microwave cooking, with controls to protect delicate foods, gently melt chocolate or butter, reheat foods evenly, or simply bring liquids to a boil quickly. Electronic touch controls let consumers quickly choose the appropriate cooking option. The unit has a digital display panel to show information such as the time of day or cooking time countdown.

The GE Microwave Oven Combi and its many features and large capacity make it well suited to family meal preparation as either a primary or supplemental oven.

The outstanding line up of GE microwave ovens also includes:

- The 28 liter GE Microwave Oven Grill (model GMOG28) with 900 watts of microwave power features a 1,000 watt electric grill for enhanced browning of foods. The countertop model, with touch controls, includes an automatic defrost setting that uses the weight of the food to base defrost time.

- The 25 liter capacity GE Microwave Oven model GMOM25) is a great kitchen tool – one of the best choices for reheating food, cooking vegetables, melting butter or chocolate for baking, and other useful cooking tasks. This 900 watt microwave oven features touch controls, speed and weight defrost and a push button door opening.
