GE Monogram Dual Fuel Pro Range Cooker Combines American Performance and European Styling -- Now Available in 90cm Width

Brussels, Belgium – The innovative GE Monogram Dual-Fuel Pro Range Cooker is for the person who loves to cook and entertain. And now it is available in a 90 cm width to offer an option to consumers who do not have the kitchen specifications to accommodate the larger 122 cm Monogram range cooker but aspire to cook on a professional style range that will be the focal point of the kitchen.

The Monogram Range Cooker's authentic professional appearance with European styling includes premium grade stainless steel with smoothly finished edges, large control knobs and heavy duty handles. The Monogram Pro Range Cooker is dual fuel, providing the speed and responsiveness of a gas cooktop with the versatility of an electric oven. No matter whether you need a range that uses natural gas or liquid propane, the Monogram Pro range cooker has you covered.

The ergonomic tilted control panel with die-cast pro knobs with easy to see settings, convenient full-extension racks and a large storage drawer with soft-closing feature make the range cooker easy to use.

The range cooker features four sealed burners and a griddle. The burners are topped with interlocking continuous cast iron grates. Two of the burners are dual-flame burners delivering a full spectrum of heat settings from an ultra-low simmer, perfect for delicate sauces, to an intense 4.15 kW, powerful enough to sauté foods in a snap. The center griddle offers a large cooking surface that is versatile and convenient to use – perfect for chops or brochettes.

Consumers who love to entertain will enjoy one of the largest main oven cavities in the market, perfect for creating a culinary feast for a crowd or an elegant dinner for two. The oven combines convection technology with multiple heating elements to provide superb baking and roasting results. It boasts a 71 liter capacity – enough room to cook multiple courses at the same time.

This beautiful Monogram Pro range cooker is handcrafted at a dedicated workstation and its elegant but assertive appearance reflects this craftsmanship. This range cooker provides the innovation of an American appliance coupled with the impeccable styling of European design. And now it is available in a size perfectly suited for smaller kitchens or kitchen renovations.

Optional accessories for the Monogram Pro Range Cooker include a stainless steel griddle cover and a cast iron ring for wok cookery. A stainless steel backsplash with warming shelf and 90 cm hood will also be available for purchase.
